1. INTRODUCCIÓN

PÁGINA OFICIAL PRINCIPAL

https://www.jetbrains.com/es-es/idea/

DESCRIPCIÓN GENERAL

https://www.jetbrains.com/help/idea/discover-intellij-idea.html

FUNCIONALIDADES

https://www.jetbrains.com/es-es/idea/features/

2. VIDEOS DE CONSULTA PARA REFUERZO

CANAL YOUTUBE OFICIAL DE INTELLIJ IDEA BY JETBRAINS

https://www.youtube.com/results?search_query=INTELLIJ+IDEA+BY+JETBRAINS

CURSO TALLER OPENWEBINARS

- Los atajos de teclado más importantes.
- Funcionalidades útiles del IDE.
- Crear nuestros propios snippets.

https://openwebinars.net/academia/aprende/productividad-intellij/?enroll=1&from list=#

CURSOS YOUTUBE

https://www.youtube.com/watch?v=lmKm5TK3lCU

- creamos un proyecto de ejemplo y vemos cómo ejecutarlo, guardarlo y cargarlo posteriormente.
- examinamos las ayudas a la edición de código y detección de errores que provee la herramienta y cómo depurar nuestros códigos empleando los puntos de ruptura y la inspección de variables.

3. <u>LICENCIA Y DESCARGA</u>

OBTENER LICENCIA GRATUITA

https://www.jetbrains.com/es-es/community/education/#students/

DESCARGAR SEGÚN SISTEMA OPERATIVO

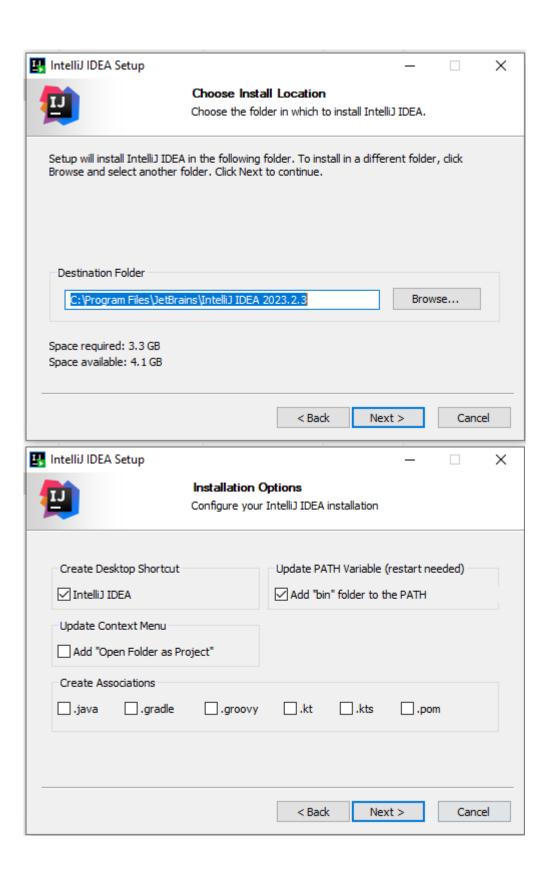

https://www.jetbrains.com/es-es/idea/

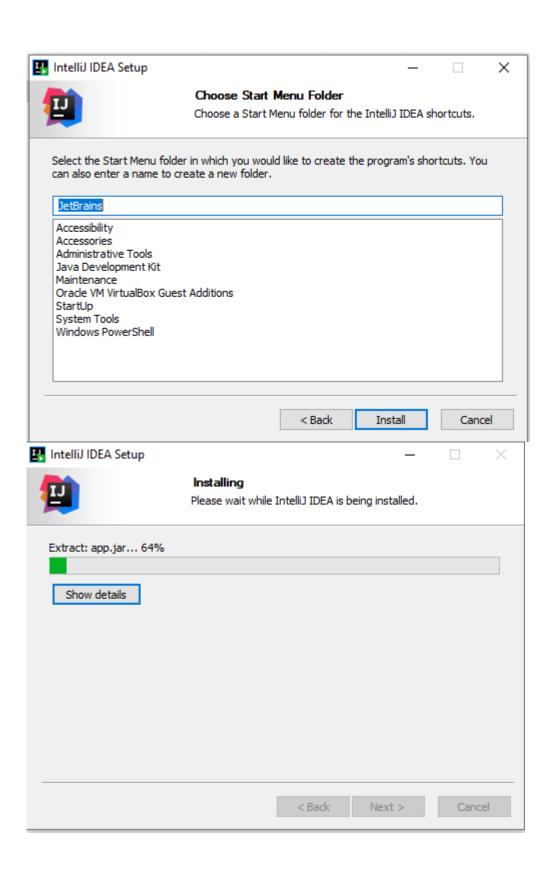

4. INSTALAR EN WINDOWS:

Abrir archivo ideaIU-2023.2.3.exe para arrancar el asistente de instalación:

5. <u>INSTALAR EN UBUNTU</u>

Download the tarball ≯ .tar.gz.

2. Extract the tarball to a directory that supports file execution.

For example, to extract it to the recommended **/opt** directory, run the following command for IntelliJ IDEA Ultimate:

```
$ sudo tar -xzf ideaIU-*.tar.gz -C /opt
```

For IntelliJ IDEA Community, run:

```
$ sudo tar -xzf ideaIC-*.tar.gz -C /opt
```

Do not extract the tarball over an existing installation to avoid conflicts. Always extract it to a clean directory.

Execute the idea.sh script from the extracted directory to run IntelliJ IDEA.

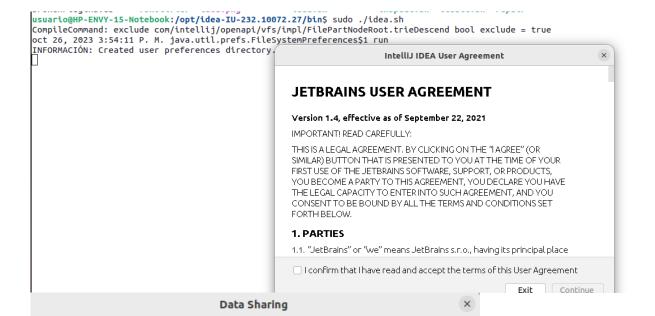

usuario@virtual1:/opt/idea-IU-232.10072.27\$ ls bin build.txt help Install-Linux-tar.txt jbr lib license plugins product-info.json usuario@virtual1:/opt/idea-IU-232.10072.27\$ cat Install-Linux-tar.txt IntelliJ IDEA INSTALLATION INSTRUCTIONS

1. Unpack the IntelliJ IDEA distribution archive that you downloaded where you wish to install the program. We will refer to this location as your {installation home}.

2. To start the application, open a console, cd into "{installation home}/bin" and type:

./idea.sh

usuario@virtual1:/opt/idea-IU-232.10072.27\$ cd bin usuario@virtual1:/opt/idea-IU-232.10072.27/bin\$ ls appletviewer.policy format.sh idea64.vmoptions idea.properties brokenPlugins.db fsnotifier idea.png usuario@virtual1:/opt/idea-IU-232.10072.27/bin\$ sudo ./idea.sh

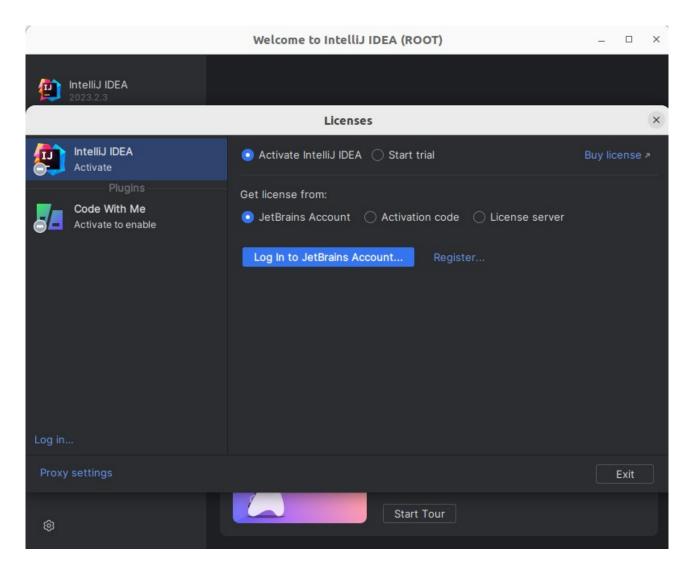

DATA SHARING

Help JetBrains improve its products by sending anonymous data about features and plugins used, hardware and software configuration, statistics on types of files, number of files per project, etc. Please note that this will not include personal data or any sensitive information, such as source code, file names, etc. The data sent complies with the JetBrains Privacy Policy.

Data sharing preferences apply to all installed JetBrains products.

You can always change this behavior in Settings | Appearance & Behavior | System Settings | Data Sharing.

6. EJECUTAR LA PRIMERA VEZ

EN WINDOWS

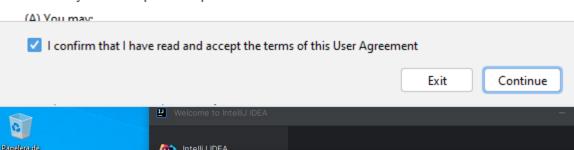

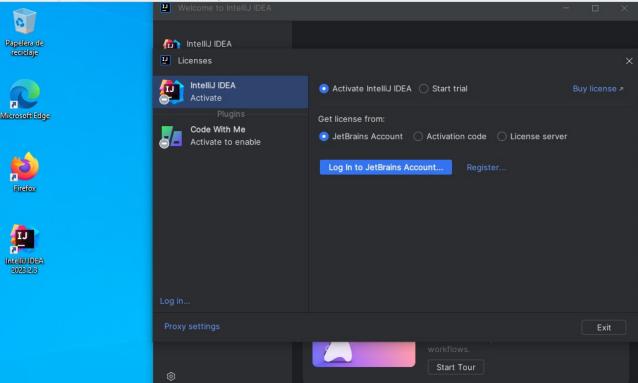

plans, and stating the applicable use limitations for the Product (such as, for example, the number of Users and the license period).

X

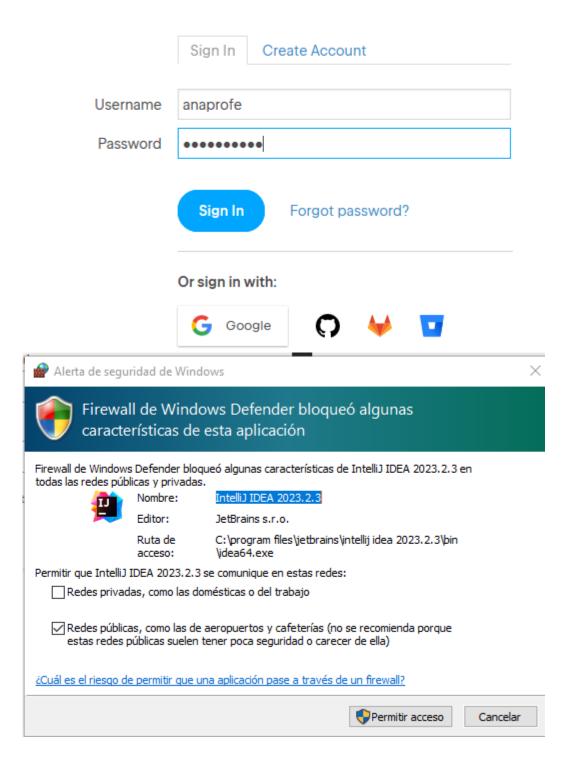

3. GRANT OF RIGHTS

- 3.1. The Product is provided to Product Holder on a 'per user' basis, where Product Holder must assign a Subscription to a specific User who may deploy the Product on multiple Machines in accordance with the Product documentation. If the Product is accessed via a Floating License Server (as described in Section 6.3), the Product is provided to User on a 'per machine' basis, where the Floating License Server allocates the Subscription to a specific Machine that can only be used by one User at a time. If Product Holder and User comply with the terms of this Agreement, JetBrains grants to Product Holder and User the rights set out in this Section 3 to the extent necessary to enable Product Holder and User to effectively use the Product. All other rights remain reserved by JetBrains.
- 3.2. Unless the Subscription has expired or this Agreement is terminated in accordance with Section 13, and subject to the terms and conditions specified in this Agreement, JetBrains grants you the non-exclusive and non-transferable right to use each Product covered by the Subscription as stipulated below:

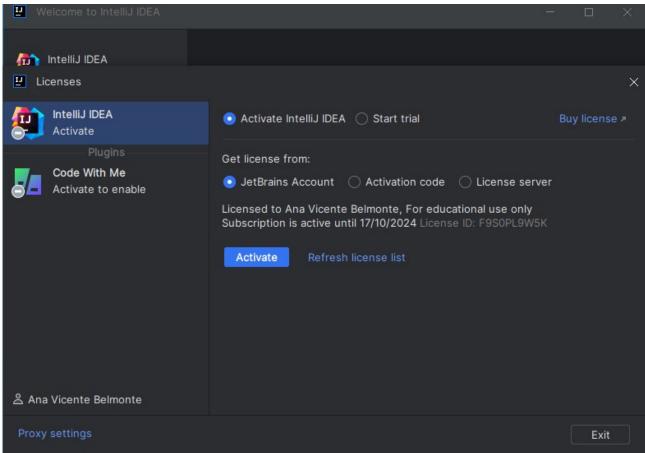

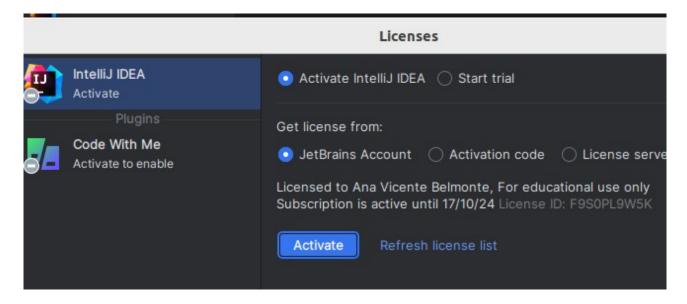

Authorization Successful

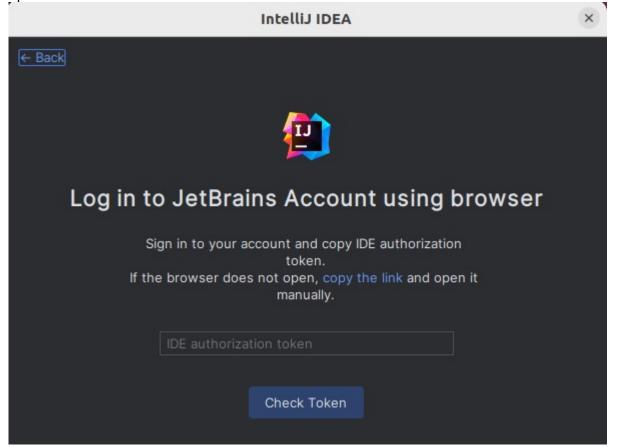

You can close this page and return to the IDE

Activar la licencia.

11. <u>DEPURACIÓN DE CÓDIGO</u>

ESTABLECER PUNTOS DE RUPTURA

```
package Prueba;
2
3 >
       public class HolaMundo {
40
           public static void main(String[] args) {
5
                int a=3;
               int b=2;
                b+=a;
                System.out.println("Hola Mundo que tal?");
                System.out.println(a +" "+b);
                for (int i = 1; i <= 10; i++) {
11
12
13
                   // Press Mayús+F9 to start debugging your c
14
                   // for you, but you can always add more by
                    System.out.println("i = " + i);
                }
16
```

INICIAR LA DEPURACIÓN

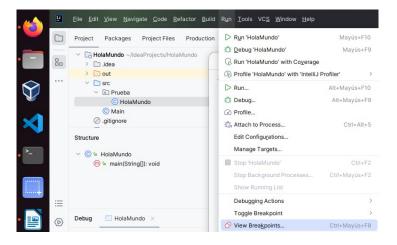

VERIFICAR VALORES DE VARIABLES

Console $\stackrel{\frown}{\leftarrow}$ \square \square \square \square \triangle \bot \triangle \bigcirc \varnothing :

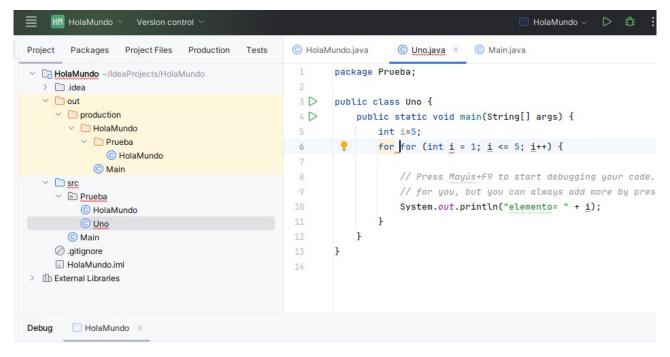

AVANZAR/PARAR LA DEPURACIÓN

VER BREAKPOINTS: Menú Run> View Breakpoint

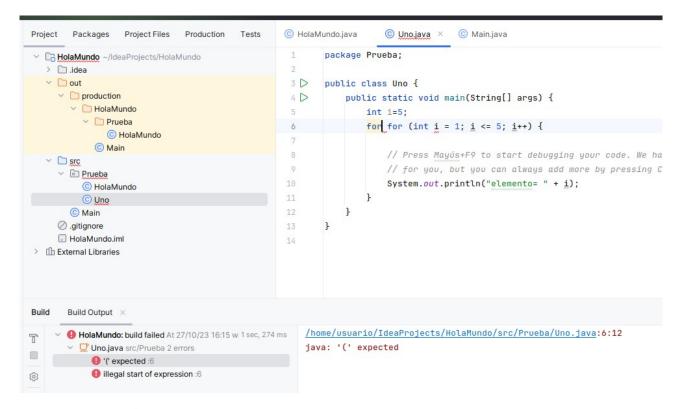

12. COMPILACIÓN Y CONSTRUCCIÓN

Cuando se ejecutan los proyectos los ficheros .java de la carpeta **src**, se compilan y se generan los archivos ejecutables .class en la carpeta **out**.

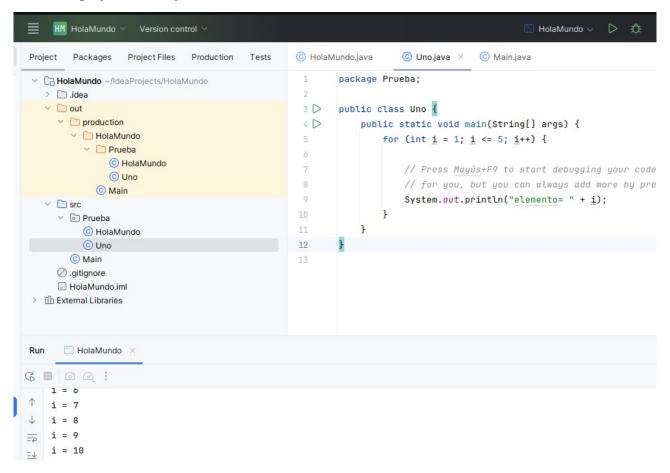

Si el código tiene errores no se compila.

Al ejecutar el código con errores nos indica las líneas dónde están y nos sugiere cómo solucionarlo.

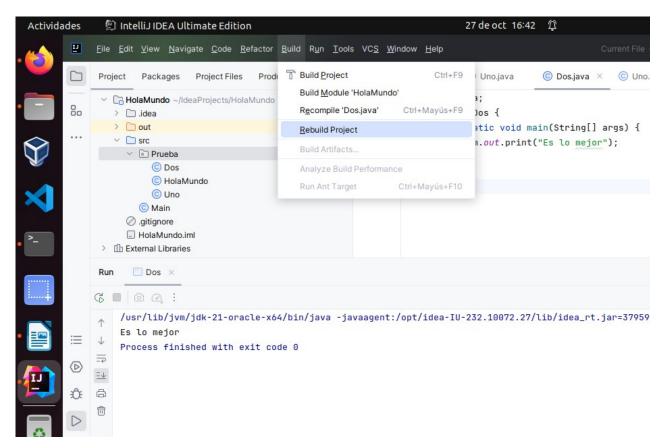

Tras corregir y volver a ejecutar:

Cuando se ejecuta también se construye la aplicación y se recargan todas las carpetas implicadas.

CONSTRUCCIÓN/ RECONSTRUCCIÓN DE LA APLICACIÓN

Es necesario cuando se añaden nuevas clases o nuevos elementos a una aplicación

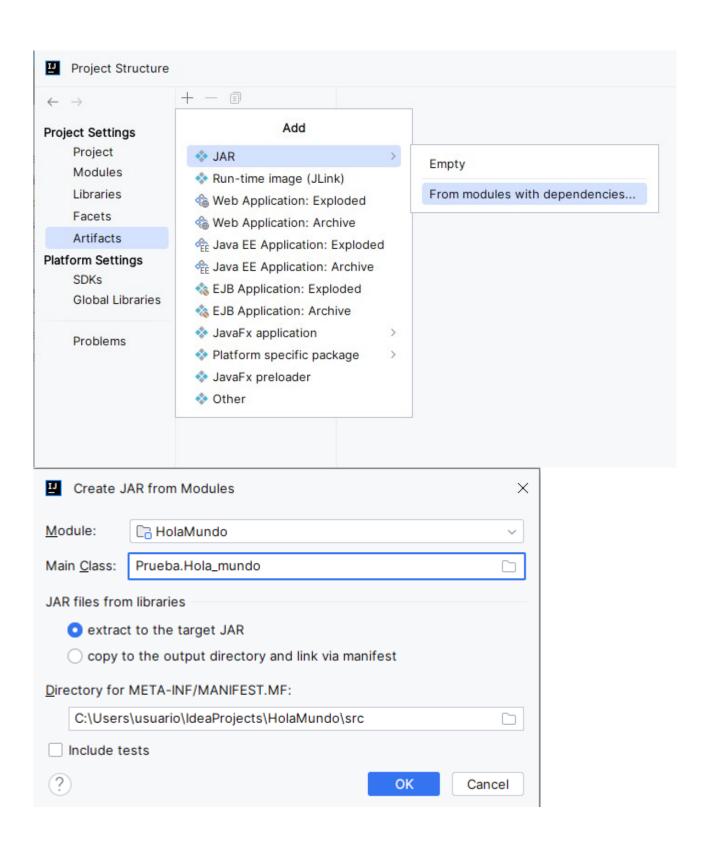

PARA MÁS INFORMACIÓN: https://www.jetbrains.com/help/idea/compiling-applications.html

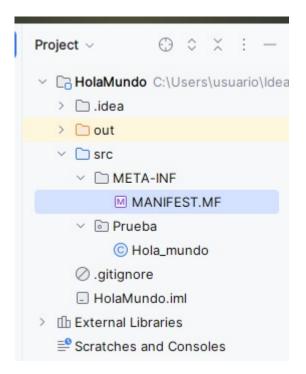

13. EMPAQUETAR APLICACIÓN EN ARCHIVO JAR

- When the code is ready, you can **package** your application in a Java archive (JAR) so that you can **share** it with other developers.
- A built Java archive is called an artifact.

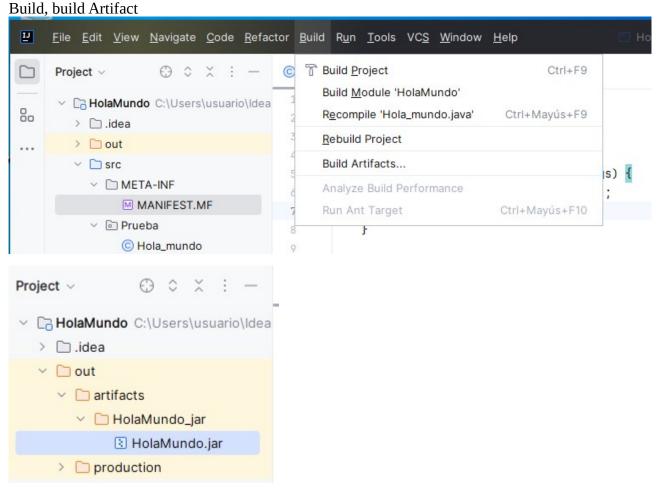

Create an artifact configuration for the JAR

- 1. Go to File | Project Structure (Ctrl Alt Shift S) and click Artifacts.
- 2. Click +, point to JAR and select From modules with dependencies.
- To the right of the Main Class field, click = and select HelloWorld (com.example.helloworld) in the dialog that opens.
 - IntelliJ IDEA creates the artifact configuration and shows its settings in the right-hand part of the **Project Structure** dialog.
- Click Apply to save the changes and close the dialog.

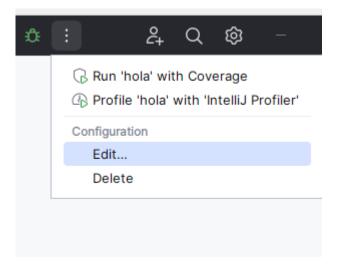

Construir el JAR artifact

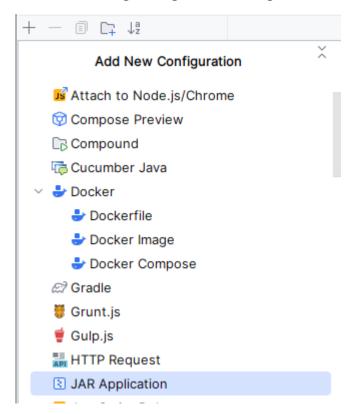

EJECUTAR APLICACION EMPAQUETADA EN ARCHIVO JAR

1. Configurar

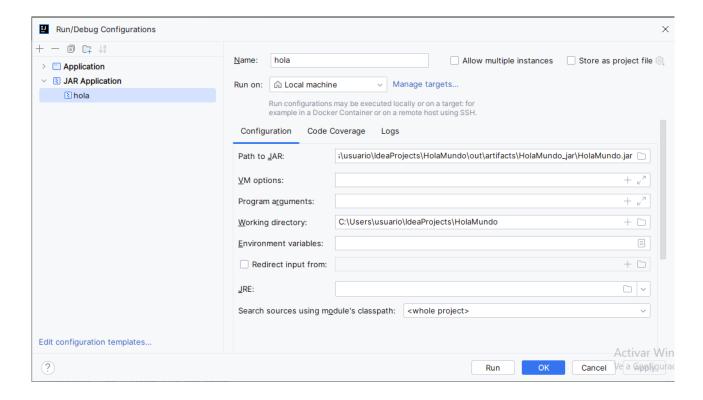

• Edit Configurations

• In the Run/Debug Configurations dialog, click + and select **JAR Application**.

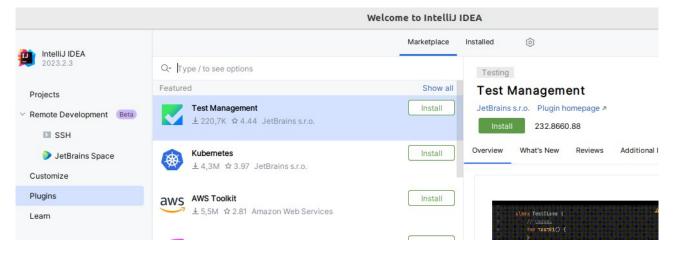

- Name the new configuration: hola.
- Indicar Path to JAR

14. INSTALAR PLUGINS

https://www.jetbrains.com/help/idea/managing-plugins.html

15. HERRAMIENTAS INTEGRADAS

Code with me: Al añadir este plugin se permite compartir el proyecto con otros programadores y permitir la colaboración, ayuda, etc

https://www.jetbrains.com/help/idea/code-with-me.html

Database Tools and SQL: Esta funcionalidad se basa en el plugin de herramientas de base de datos y SQL, que se agrupa y se habilita en IntelliJ IDEA por defecto.

Con el plugin, puedes consultar, crear y administrar bases de datos.

Las bases de datos pueden funcionar localmente, en un servidor o en la nube.

El plugin es compatible con MySQL, PostgreSQL, Microsoft SQL Server, SQLite, MariaDB, Oracle, Apache Cassandra y otros.

https://www.jetbrains.com/help/idea/relational-databases.html

Docker:

IntelliJ IDEA integra la funcionalidad de Docker y proporciona asistencia para crear imágenes Docker, ejecutar contenedores Docker, administrar aplicaciones Docker Compose, utilizar registros Docker y privados, y mucho más directamente desde el IDE.

https://www.jetbrains.com/help/idea/docker.html

16. MIGRAR DESDE ECLIPSE A INTELLIJ

https://www.jetbrains.com/help/idea/migrating-from-eclipse-to-intellij-idea.html
